TALENT TECHNOLOGY RELEASES UPDATE TO HIREDESK

New release delivers customer-driven enhancements for increased flexibility and time savings

Vancouver B.C., — July 16, 2008 — Talent Technology Corporation, an award-winning provider of applicant tracking software and component recruiting technology, today announced the latest release of its HireDesk Corporate and HireDesk Staffing products. Both products include a number of new capabilities and customer driven enhancements that deliver increased flexibility, time savings, and incredible ease of use.

Key functionality in this release includes the **Talent Qualification Interview**, Candidate and Client Recycle Bin feature, and incoming/outgoing email enhancements. "The HireDesk products have set a new benchmark in the recruiting industry," stated Jade Bourelle, CEO of Talent Technology. "There is a growing need to source, offer, and hire candidates faster, and with TQI our clients can configure a net interview much faster and bring great talent to their teams quicker."

Significant new HireDesk features include:

- **Talent Qualification Interview** – Talent Qualification Interview has replaced the Net Interview. TQI is more convenient to configure, easier to use and runs much faster. Saving you time by simplifying question creation, configuration and library management. Templates speed up the creation of custom interviews by letting you assemble them from predefined question sets.
- **Candidate/Client/Hiring Manager Recycle Bin** – Deleted candidates, new applicants, and clients/hiring managers are now stored temporarily in a recycle bin, so users can recover deleted data if needed.
- **Additional Activity to Multiple Records Enhancement** – HireDesk users now have the ability to either add individual calendar activities or one shared calendar activity when selecting multiple records.
- **Singapore and Malaysia Phone Number and Names Extraction** – automated extraction of candidate data from uploaded resume now recognizes name and telephone formats for Singapore and Malaysia.

This new version of HireDesk is now available to all customers.

About Talent Technology Corporation
